FileZilla Instructions

To configure the FileZilla FTP client to access your directFX Solutions FTP Account:

1	**Step One** Download and install the FileZilla FTP client: https://filezilla-project.org/
2	**Step Two** Open the FileZilla FTP client.
3	**Step Three** Select the *Import* option from the *File* menu (File > Import).
4	**Step Four** Select your FTP Client Configuration File and click the *Open* button.
5	**Step Five** Click the *OK* button on the *Import Settings* window.
6	**Step Six** Open the ftp.directfxsolutions.com site entry in the *Site Manager* from the *File* menu (File > Site Manager > ftp.directfxsolutions.com).
7	**Step Seven** Enter your password in Password field.
8	**Step Eight** Click the *Ok* button to connect to ftp.directfxsolutions.com.

The above steps will save your FTP User credentials in FileZilla. To connect to ftp.directfxsolutions.com in the future, simply select ftp.directfxsolutions.com from the Site Manager to reopen the FTP connection.
